

# Small Batch Fluidized Beds

These fluidized beds are commonly used for dipping small metal parts. The powder is fluidized with compressed air, which is regulated down with a regulator and control valve. Standard and custom sizes are available.

## Standard Features:

- ✧ Stainless steel construction
- ✧ Flanged fluidization plate
- ✧ Regulator and control valve

## Optional Features:

- ✧ Vibrating base
- ✧ Cover for tank
- ✧ Exhaust hood
- ✧ Dust collection system

## Contact Information

To find out more about our services or to discuss your project with an ACT engineer, you may contact Applied Chemical Technology by phone, fax, or email. All initial consultations are strictly confidential and free of charge.
